EDUCATION

2022 – 2026 BSc (Hons) Computer Science (Software Engineering)

Completed 1st year with an overall mark of 72% (equivalent to 1:1)

I am predicted in my second year to end with a 1:1

TECHNICAL SKILLS

Languages: JavaScript, Python, C++, C#, Java

Developer Tools: VScode, Android Studio, Postman

Technologies/Frameworks: React, React Native, Nodejs, HTML, CSS, Tailwind, NextJS

Databases: SQL, Supabase, Firebase

WORK EXPERIENCE

Torbridge Capital Micro-Internship, - Intern, April 2025

I interned at Torbridge Capital where I created multiple scripts in Python that automate email service with API endpoints which is projected to save 2 hours every week. I learned a lot from the internship about making production ready and efficient code and how to create a program that suites the business's needs.

Hollywood Bowl, - Team Member, February 2022 - October 2022

I was a team member at Hollywood Bowl Longwell Green Bristol. In this role I developed Team working, Time management and computer skills as I had to make sure I did everything in a time to give the best experience to the customer. I also worked to fix and maintain the arcade machines whilst I was on shift making sure they were working and functional

Kingswood Sports Bar, - Bartender, May 2023 – September 2024

I was a bartender at a pub. In this role I developed my problem solving to serve as many customers as I could in the shortest time frame possible whilst keeping a high customer review rating.

OTHER EXPERIENCE

Meowzie.co.uk – <https://meowzie.co.uk>

I have created a social app but just for cat videos and pictures it works in a similar way to TikTok. However We rely on donations to run the app, and we also donate to cat charities in the UK and internationally. This App is created with React Native, Firebase, Tailwind and JS. This project taught me full-stack development And how to release a product to the public organically.

Plymouth Computer Science Society, — Webmaster

I am currently in a committee position at the Plymouth computer science society as webmaster where I must develop and maintain a webpage for the society as well as work in a group environment to help run the society and set up events for our members. This has given me experience in team working and leadership as well as improving my computing skills with the web page. Host hackathons and programming workshops for members to improve their programming skills.

Plycs.com, — Lead front-end and back-end developer – <https://plycs.com>

I am the main developer for the Plymouth computer science society where I develop new features and maintain the webpage. I created the website with React, JavaScript, HTML, Tailwind and NextJS.

PLYHACK 2025,

Helped host the 2025 Plymouth Hackathon where we organised food, drinks, the Theme and all the attendees in a 24-hr programming challenge we have 30+ attendees, who all created amazing projects.

About me

I'm Currently a year two student at Plymouth University studying software engineering. I am a hardworking and face paced person who loves to problem solve. I got a first in my first year with 80% in my software engineering module. Hoping to make software more friendly, accessible and human understood.
